Turkey Breeders Participating in the U. S. Record of
 Performance Breeding Stage of the National Turkey Improvement Plan

The publication of this list is for the purpose of developing greater efficiency in the operation of the National Turkey Improvement Plan. Additional information regarding these breeders may be obtained by writing to them or to the TURKEY ROP supervisors in their respective States.

The list shows the number of single-tom matings, the number of hens trapnested and the pullorum classification for each flock. Due to the fact that the trapnesting of turkeys under ROP supervision is new, practically all of the matings comprise ROP and ROM candidates.

Flocks, matings, and hens trapnested, by varieties, Spring of 1947.

Variety	Flocks (Number)	Single-tom matings (Number)	Hens Trapnested (Number)
Broad-Breasted Bronze	43	359	4,527
White Holland	9	48	616
Beltsville Small White	5	19	261
Narragansett	2	7	101
Black	1	2	30
Bourbon Red	1	1	15
Total	61	436	5,550
